One Month: Learn to Code | Online Coding Courses

In my experience, one of the best ways to learn Python is through practicing what you already know by writing your programs. Creating simple programs is easy. Don't worry about trying to write the next best-selling piece of software or game. Instead, focus on creating small pieces of code that do specific things. Let the following steps guide you when you start your first project: Brainstorm ...

10 Basic Python Examples That Will Help You Learn Fast

In our previous article Implementing PCA in Python with Scikit-Learn, we studied how we can reduce dimensionality of the feature set using PCA.In this article we will study another very important dimensionality reduction technique: linear discriminant analysis (or LDA). But first let's briefly discuss how PCA and LDA differ from each other.
